Portfolio: <https://narendra-kumar-kotipalli.vercel.app/>

Professional Summary

GenAI Engineer and Full Stack Developer with 3 years of experience building scalable AI-powered web applications using **React, TypeScript, Node.js, and Python (FastAPI)**. Skilled in **LLM integrations, RAG pipelines, and AI-driven automation systems**. Experience leading frontend development, building secure APIs, and delivering high-performance applications. Improved UI quality and reduced production defects by 30% through optimized development practices.

Professional Skills

Front-End:

React.js, TypeScript, Redux Toolkit, JavaScript (ES6+), React Flow

UI & Styling:

HTML5, CSS3, Tailwind CSS, Material UI (MUI), Bootstrap 5, SASS/SCSS

Back-End (Basic):

Node.js, Express.js, Python, FastAPI, REST API Development, JWT Authentication

GenAI & AI Tools:

Cursor, Antigravity, ChatGPT, Gemini AI, Perplexity, Claude, GitHub Copilot, Builder.io, LLMs (Google Gemini), RAG, Prompt Engineering

Database & Caching:

MongoDB, PostgreSQL, Redis.

Cloud & DevOps:

Docker, GCP, Cloud Storage, BigQuery, GitLab CI/CD.

Tools & Practices:

Git, Bitbucket, Postman, JIRA, Agile/Scrum, Responsive Design, JSON, Environment Configuration (.env), Version Control Best Practices, API Testing, Secure Coding Practices.

Professional Experience

GenAI Engineer / Full Stack Developer - FIS Clouds Pvt. Ltd | Hyderabad (Feb 2024 – Jul 2026)

Gurita AI — Agent Automation Platform

AI-driven enterprise automation platform enabling intelligent agents for search, data analysis, and document generation using RAG-powered workflows (Google Gemini).

Tech Stack: React, TypeScript, Redux Toolkit, React Flow, Node.js, Python, FastAPI, MongoDB.

- Built a drag-and-drop workflow builder using React and TypeScript, improving productivity by 40%
- Architected scalable REST APIs with Node.js and FastAPI, reducing latency by 25%

- Designed role-based access control (RBAC) with JWT authentication for secure access
- Enabled real-time workflow tracking using WebSockets
- Created centralized data pipelines for AI-driven processing and automation
- Implemented i18n for 9 languages, improving global accessibility

Curie — AI-Powered Research Platform

Biomedical research platform streamlining literature curation, hypothesis generation, and clinical documentation workflows.

Tech Stack: React, TypeScript, MUI, Python, FastAPI, MongoDB.

- Built full stack modules for AI-based document generation and summarization
- Engineered APIs for document parsing, structured data extraction, and semantic search
- Integrated real-time AI services to streamline research workflows
- Optimized backend pipelines, reducing data processing time significantly

RPA Web Automation Platform

A no-code/low-code RPA system that enables users to record web actions and replay them automatically.

Tech Stack: Python, FastAPI, React, Redux, PostgreSQL, Redis.

- Designed a browser automation platform enabling workflow recording and execution
- Built secure data injection and credential encryption mechanisms
- Improved performance with Redis caching, reducing execution time by 30%
- Scaled automation workflows across multiple environments

Web Developer Intern (6 months) - Visual Path | Hyderabad (Jul 2023 – Jan 2024)

Health Care — Appointment site

A simple and patient-friendly appointment booking system that helps users schedule visits based on real time doctor availability. Patient details and booking information are securely stored in MongoDB, which also helps fetch up-to-date doctor availability data. Users receive instant email confirmations with their appointment time using React Email, making the process clear and convenient.

PValue Statistics — Clients contact form

A user-friendly contact form designed to collect client information efficiently and store it directly in Google Sheets. This system captures essential details such as name, email, phone number, and other inputs in real time, ensuring organized data management and easy accessibility. It streamlines the process of gathering client inquiries, improves response tracking, and eliminates manual data entry.

Education

Aditya College of Engineering, Surampalem

Bachelor of Technology (B-Tech) in Mechanical Engineering

July 2018 – May 2021
